## Woodland Agricultural Services

### Pellet Lime And Fertilizer

Premium Hi-Cal pelletized lime increases your yields and provides soil Ph adjustments. Provides the highest amount of calcium in a pelletized form, with only trace amounts of magnesium. It also increases nutrient availability. You can also blend it with dry fertilizer. Application rate depends on P.H. soil test. Typical range is 500-750 lbs per acre. It can be applied in spring or fall. Pelletized limestone provides proper PH maintenance, producing top yields. Optimum PH levels results in better nutrient uptake, improving fertilizer efficiency. Can also be accurately applied without fear of drift. improves triazene herbicide performance for improved grass and broadleaf control.
